

Q1 2026 – Quality Control

Summary

Facility coverage: Lyon-France, Milan-Italy, London-UK, NJ-USA
Period: Jan 1 — Mar 31, 2026
Author: Sophie Martin (QC Director, EU)

Overview

Q1 2026 was a clean quarter overall. 412 production lots inspected, 408 passed first-time, 4 placed on hold pending re-inspection (all released after corrective action). No major incidents, no recalls, no customer-facing quality events.

Key metrics

Metric	Value
First-pass yield	99.0%
Lots placed on hold	4 (Lyon: 2, Milan: 1, NJ: 1)
Lots recalled	0
Texture-related customer complaints	< baseline (0.4% of returns)

Equipment maintenance

All quarterly calibration checks completed on schedule. Homogenizer fleet (HMG-01 through HMG-08 in Lyon, MLN-01/02 in Milan) within normal operating tolerances. Next quarterly calibration scheduled for

May 2026.

Recommendation

Continue current QC cadence. No changes to inspection protocol recommended.
